[1] Quick overview of “big picture”. What we have, what's missing
[2] Reports from workers

Comments:

[1] Group of people working on reconstruction is small:
Jon, Andre, Sharon, David, Pierrick, Tim, Nick, Durga
(Thanks!!!)

[2] All on this list have other responsibilities

[3] To accelerate schedule:
a. Free these people up from other responsibilities
b. Add people to this list

[4] No one's written code for this detector before: hard to predict what will go fast and what will take time

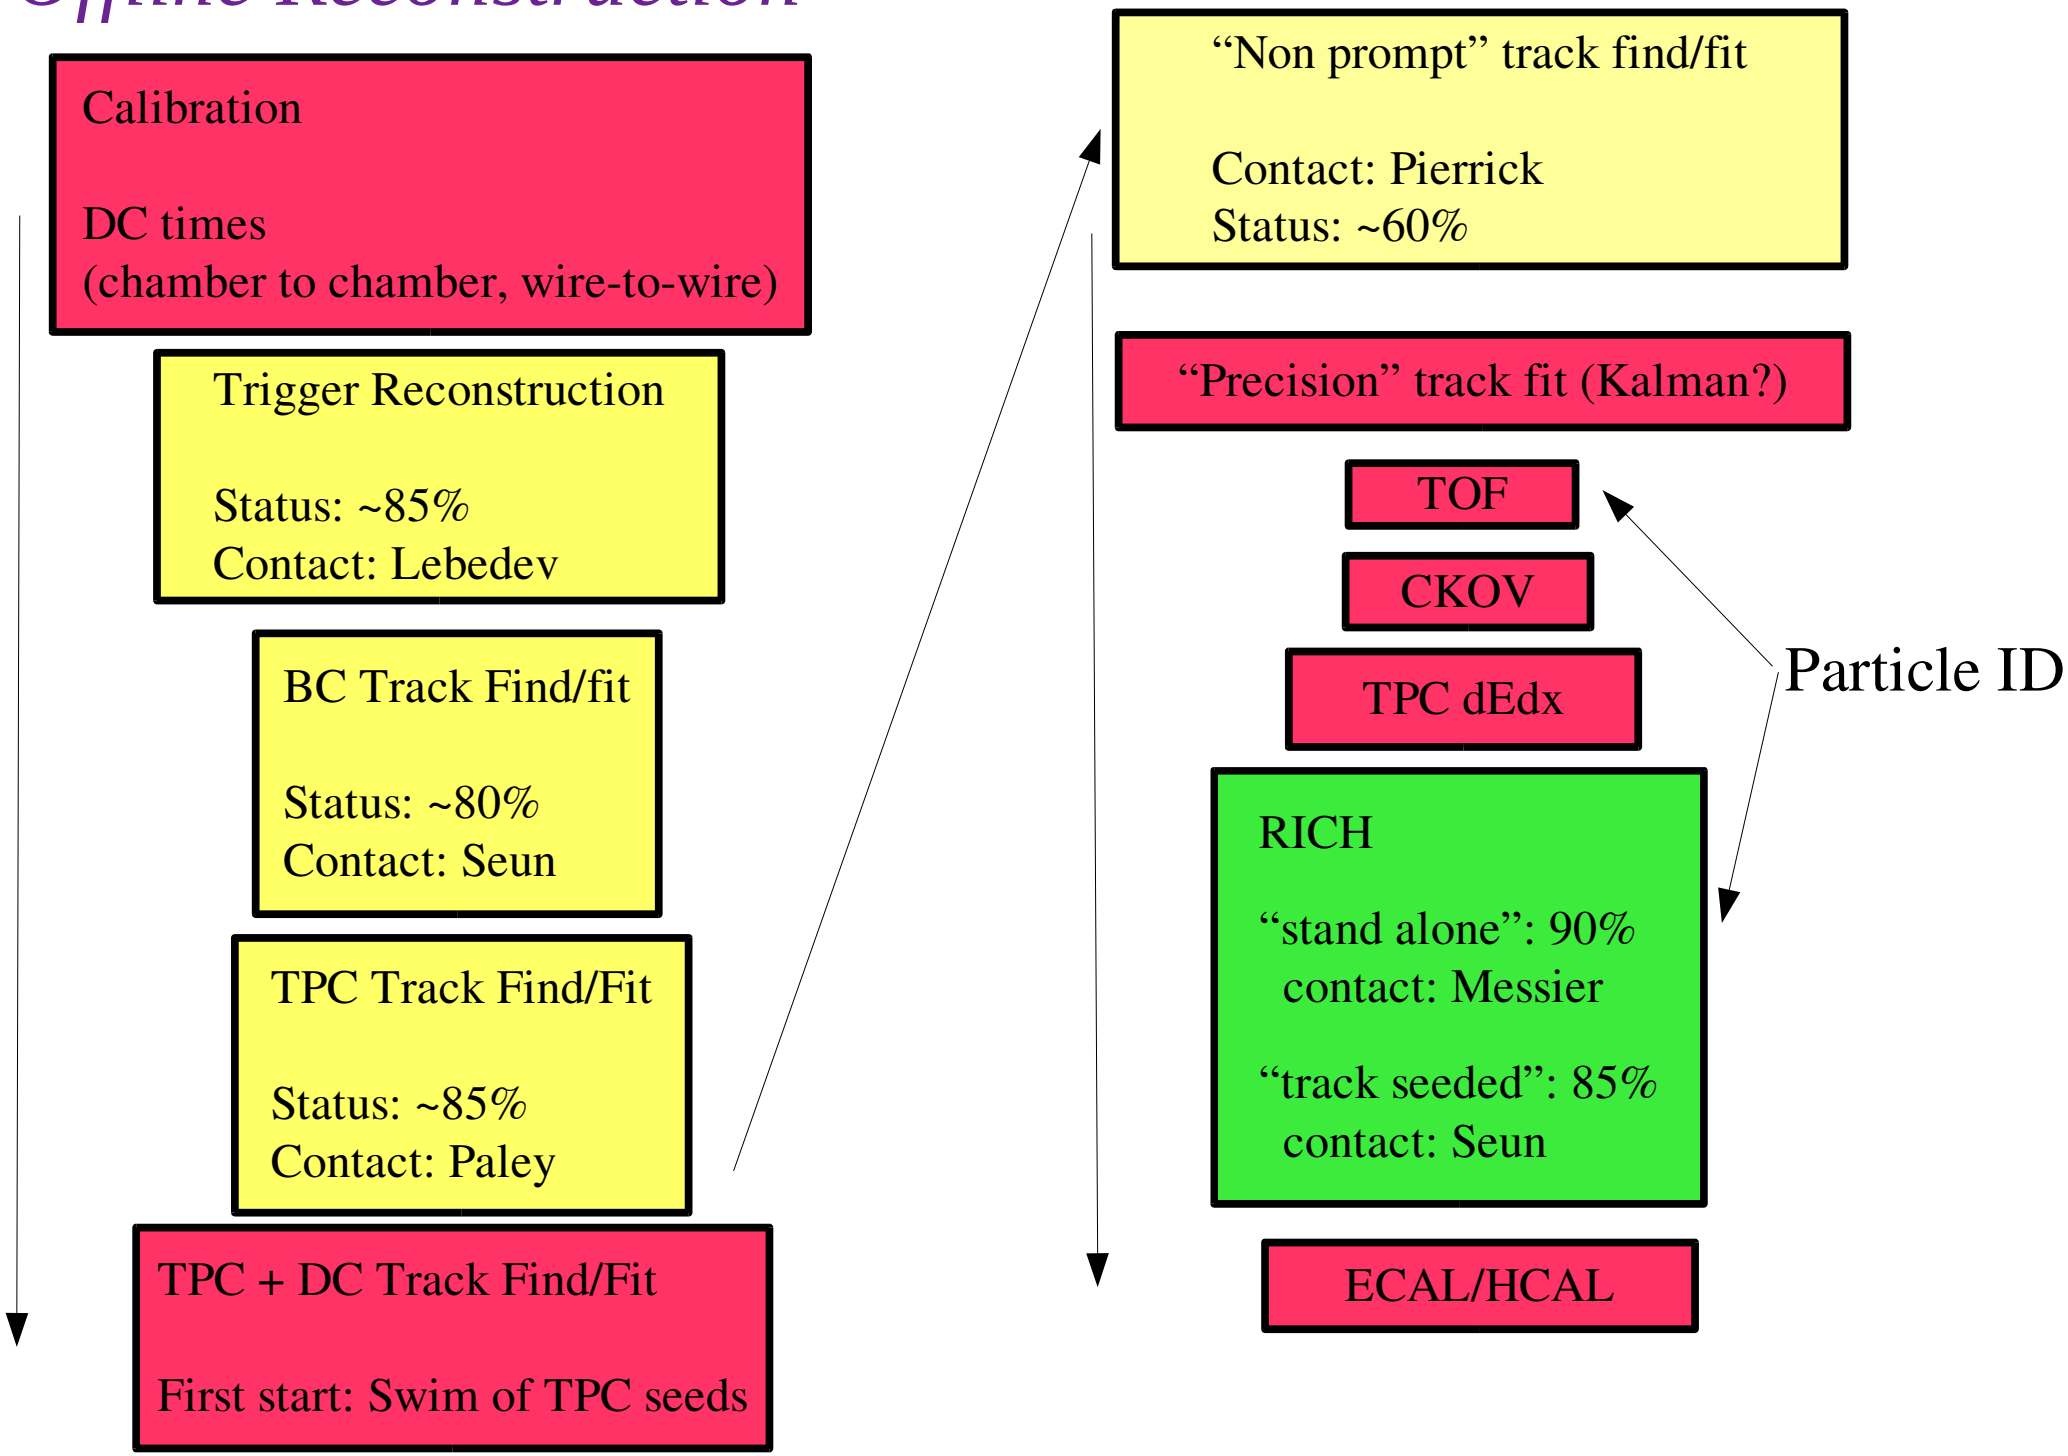
(Tim and Durga recent additions!, only HCAL and CKOV left out)

Offline Reconstruction



Database discussion

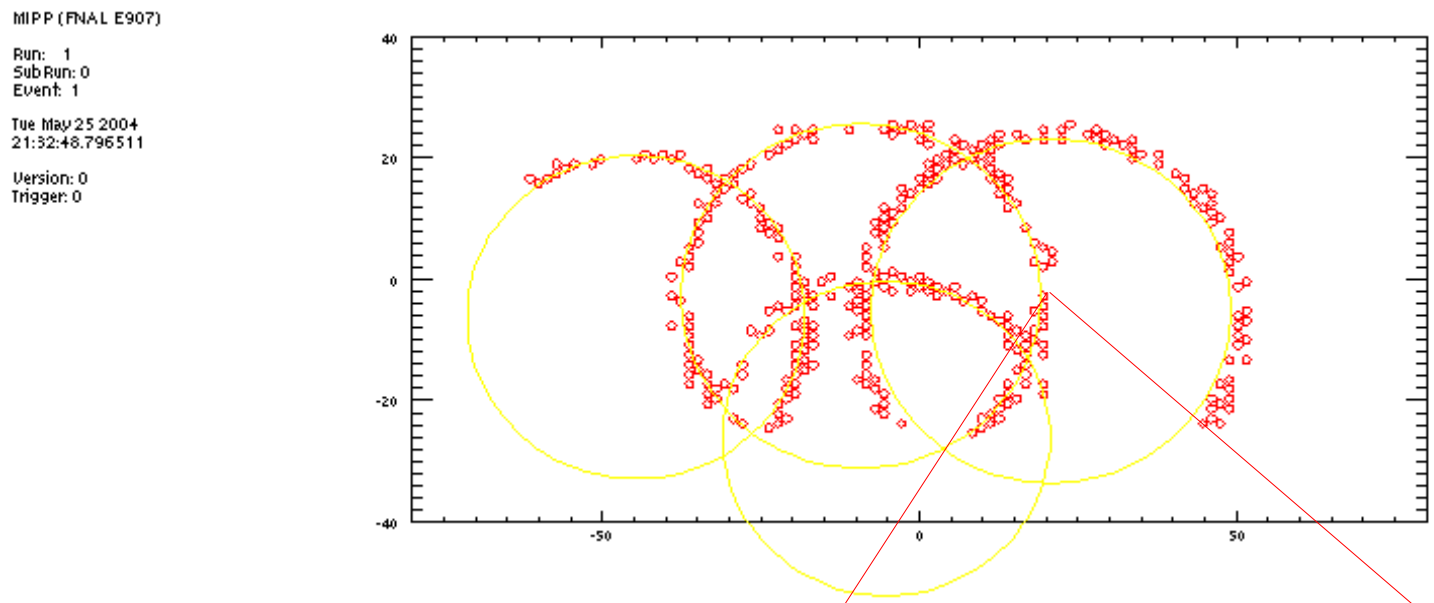
- Who's using the database? Success/failure reports...

- Requirements for database use.

  * What have people done/tried to do with the DB?
    (Andre:DAQ, Nick: ACNET/IFIX data)

  * What have people wanted to do that was not supported?

- Connection Maps: what's the plan to get them (all) into the database?



MC Event

yellow rings were found

Results saved to
evt.Reco("./rich")
as RICHCirc objects
