

NuMI Target Run Status

Jonathan M. Paley

MIPP Collaboration Meeting
07/22/05

Indiana University

MIPP NuMI Run:

Second week of June: beam tuning with just the beam trigger.

Middle of June: began collecting physics-quality data using the NuMI trigger built at IU.

NuMI Trigger: three overlapping scintillators (vb, v2, v6)

"2mm" trigger: $(vb) * (!v2) * (!v6)$

"6mm" trigger: $(vb) * (v2) * (!v6)$

NuMI Target Analysis

Summary

- The NuMI target run has gone very smoothly so far. Beam is on target and fairly steady.
- With 1 spill/minute, we could reach 1.8 million triggered events by the end of the month.
- Data looks good so far! More to come...
